Hands-on Full-stack software developer with 2+ years experience in the software development life cycle. Focused on problem-solving, developing, and testing software based on client requirements with a strong ability to adapt to new projects and provide solutions that enhance software quality. Extensive experience maintaining and upgrading existing systems with strong knowledge using DevTools stacks and teamwork solutions such as JIRA, Confluence, and GIT. I'm eager to gain new knowledge, skills, and techniques that encourage me to expand professionally.
